

Crystal Worlds

1,8 million people have already been thrilled by the Swarovski Crystal Worlds since they first opened their doors in 1995.

In cooperation with André Heller and many different artists, new chambers of wonders were developed, providing visitors with new experiences.

So this exhibition keeps its vivid character and is further extended to become one of the main tourist attractions in the Inn Valley.

Church Wieskirche in Bavaria

At this place extraordinary things happened not just once: Tears, a deeply human phenomenon were turned into spiritual bricks, into a pearl-like shape, forming the world-famous Rococo church Wieskirche.

It turned into a place of worship of the scourged saviour and was already well-known in the 18th century across Europe because of its delicate baroque appearance.

It is a UNESCO World Cultural Heritage Site.
